

Al-Ahli Hospital participates for the 7th year in Darb AL Saai

Keeping its tradition of serving the country and nation alive, Al -Ahli Hospital has set up a first-aid clinic at Darb El Saai For the Seventh consecutive year to provide not only emergency treatment to visitors or staff of the exhibition but also disseminating healthy lifestyle information among people.

Since December 9 - Darb El Saai's opening day –till the 19th of December Al -Ahli clinic has given first aid treatment to as many as 1085 people. "Our doors are open to all either they are visitors or the workers doing their jobs at the exhibition," says Dr . Khalid Al Fakhri , Head of at Al Ahli Hospital's Emergency Department.

Apart from the people needing any kind of emergency treatment or first aid, school children are also visiting Al Ahli's enclosure at Darb El Saai. "We teach them hand

hygiene and provide them information as per their age group on other topics related to healthy eating and lifestyle,

Hemya team was also on hands to provide the visitors with free body composition analysis and to educate the visitors on adapting healthy life style habits.

The marketing department at Al-Ahli Hospital was so keen this year to add a series of activities and workshops for the visitors of the clinic form all ages.

Al- Ahli clinic also distributes gifts among children and to enhance people's knowledge on health issues, some other awareness material is also being distributed. "All these services we are providing here are for free and we feel proud over our contribution to the National Day related activities," Darb El Saai is also organizing workshops for people of all age groups in which they get basic first-aid training.

Our public service activities in the field of health awareness continue throughout the year and we mark each and every day fixed by World Health Organization (WHO) with complete sense of responsibility,"

Apart from the people needing any kind of emergency treatment or first aid, schoolchildren are also visiting Al- Ahli Hospital's enclosure at Darb El Saai. We teach them hand hygiene, dental care speech techniques and provide them information as per their age group on other topics related to healthy eating and lifestyle,"
